Introducing...

CS500 ROTATING RACK OVEN

Excellence Within Reach!

A high-quality rotating rack oven designed without compromising performance. Engineered with cutting edge technology and crafted from durable materials, this new offering ensures you get the best value for your money. The CS500 maintains the reliability, durability, and performance of the Baxter brand, allowing us to deliver a premium experience at an affordable price.

The CS500 is where excellence meets affordability.

Proven technology. Authentic results.

CLASSIC SERIES RACK OVEN

Discover the art of baking with the new **CS500 Rotating Rack Oven**. Designed with the user in mind, Baxter introduces a simple and affordable rotating rack oven backed by the quality and reliability you have come to know and expect from a Baxter unit.

The CS500 features an easy-to-use control that makes it easy to operate. Its clean lines and minimalist aesthetics complement any operation, while the straightforward functionality ensures that every novice operator can achieve optimal results.

1. Programmable Digital Control

- Digital, easy-to-use controls
- 99 programmable recipes with 4 step capability
- Auto On/Off feature
- Cool down mode

2. Lift & Rotate Motor

- Heavy-duty lift mechanism
- Slip clutch design for improved operation

3. New Hood

- Flat front hood with side trim available
- Non-welded, single wall hood for Type II applications
- Less CFM requirements

4. New Loading Door

- Flat front design
- Dual pane Argon purged glass – increased energy efficiency
- Single point latch with freezer style handle and latch
- Push to close – no crank handle

5. Key Design Features

- Classic design
- Weld-less heat exchanger design for reliability
- Optimized steam system

The CS500 Oven features Baxter's exclusive, best-in-class gas heat exchanger, precision airflow and industry leading steam system at an affordable price.

Proven technology. Authentic results.
