

## HOBART HTs SCALE

The food retail scale that keeps staff focused on service and you connected to the future.

## A lot of innovation for the dollar.

> > >

The challenge for any retail operation is to implement the latest technology at the most advantageous price point. Meet the Hobart HTs scale, delivering the next generation of features and functionality, the highest levels of performance and reliability, all at an unexpectedly low price.

**Advanced touch-screen operation that's simple.** The 10.1" touch-screen operator display brings simple "swiping" and "drag and drop" functionality that has been shown to improve operator speed and accuracy. The two screen options of the HTs enable the most frequent operations together with the greatest flexibility in programming options.

**New levels of customization, control and speed.** The highly intuitive screen options significantly reduce the number of keys an operator needs to use to finish transactions. The result is that the HTs is capable of being one of the fastest scales you can operate while enabling screen customization by department and individual scale.

*The main screen enables customization by departments and other variables. Flexible features include a keypad that can be static or collapsed, text fields that can be hidden and flashkeys that can populate open areas.*

*By swiping to the left, you gain access to the right side of the screen. This screen contains additional information on a specific item, such as frequent-shopper pricing, labels, graphics, recipes and nutritional data.*

*Possible center screen design option.*

> The HTs comes equipped with a full-service Help menu in addition to operator and supervisor training videos.

> A scale so intelligent and advanced, it makes easy so much easier.

## A long history of customer support.

> > >

**Built-in wired network.** Key to the speed and flexibility of the HTs is its superior communications flexibility enabled by its standard wired network connection.

Optional wireless connection is available.

**Unprecedented speed.** For many, the biggest difference when working with the HTs is the near-instantaneous completion of any task requested. Simple searches for a PLU, for example, deliver responses many times faster than other systems that are not equipped with the same processing power.

**Promoting. Training. Improving.** While the latest features of the HTs are designed to enhance your customers' in-store experience, they are also designed to improve the efficiency of employee on-boarding by enabling more training right at the scale.

- A brilliant 7" customer-facing display is the perfect tool for drawing attention to your latest specials, in-store events and other promotions.
- Instill loyalty and reinforce your brand with images and slideshows. Engage customers with cooking tips and recipes.
- The HTs comes equipped with specific use training videos and can also be uploaded with other content that helps improve communication and training in other areas.

**Reduce service costs.** Improved remote diagnostics mean you and your staff are in a much better position to get answers faster when operational issues come up. The alert icons built into the interface mean you're immediately aware of any issues and have more in-depth information that can often prevent the need for an in-person service call.

> A high-resolution customer display offers additional interaction opportunities with consumers. Perfect for conveying the most up-to-date promotions and specials.

> Legendary for its reliability, the Hobart printer features an 8 dots/mm printhead that enables more effective graphics printing. Accepting labels up to 9.5" in length, label stock is compatible with all Hobart scales.

> Additional alerts and warnings immediately notify operators of planogram updates, food recalls, as well as printer and network connection issues.

**Accomplishing tomorrow's initiatives.** The real measure of value is how well a product serves your needs today while continuing to meet those needs as your business grows and evolves. With its intuitive, innovative interface, fast processor and generous storage capacity, the Hobart HTs is designed to remain a powerful business partner long into the future.

**Your #1 supporter.** Hobart, where equipment and service join together in support of

you. Hobart makes a full line of equipment for the foodservice and food retail industries, including cooking, food machines, weigh wrap, warewashers and Traulsen refrigeration. We support our customers when and where it counts the most. In the field, at your place. With nearly 200 locations and 1,700 factory-trained service representatives across the country, we're always close by to install, maintain and service your equipment. If that's the kind of support network you've been looking for, contact your Hobart representative today by calling 888-4HOBART.

Proud supporter of you.\*
