

HOBART HTe SOFTWARE

The affordable software solution to effectively manage scale databases.

Proud supporter of you.™

New technology for managing today's leading-edge scales.

> > >

With their advanced capabilities, remote management of food retail scales and the data they produce have become nearly as important as the functionality of the scale itself. With the introduction of the Hobart HTi and HTs products, HTe software has been developed to enable independent grocers and smaller chains to take full advantage of the advanced features and reporting capabilities of these new, industry-leading scales.

Multiple versions. Multiple capabilities. HTe software is available in different versions that give independent and small chain grocers the choice of a system that works best for them. Each is intuitive, easy to use and, most important, hard to break, even for the least technology-oriented individuals and organizations. The HTe software gives users a new level of managing their scales that saves time and eliminates complication and frustration.

Remote scale access. Free to all registered HT Series scale users, this downloadable program allows you to access information from any HT Series scale on the network. This means, short of replacing labels and cleaning, you now have the ability to manage and diagnose each scale, without having to be in front of the unit. Take full advantage of remote access to such things as price look-up code information, pricing, transaction total and label changes. The result is the ability to manage the scale without interfering with its regular operation.

Key elements that can be altered remotely:

- Diagnostics – Including testing weigher and printer
- Configuration – Adjustment of settings, including frequent-shopper method and print position
- Database – Modify anything in the database instantaneously

> Available in different versions for various types of grocery operations, HTe software is designed to bring greater business insight and control.

Proudly supporting you for years to come.

Model features: A side-by-side comparison. The following chart shows which capabilities are supported by each HTe version:

	HTe Lite	HTe Single-Store
Remote scale access	Y	Y
Backup/restore	Y	Y
Asset manager	Y	Y
Product data	Y	Y
Database tables	Y	Y
Label information	Y	Y
Label graphics	Y	Y
Totals	Y	Y
Configuration	Y	Y
Alerts		Y
Label designer		Y
Media content manager		Y
Flashkey editor		Y
Scale upgrades	Y	Y
Remote monitor		Y

> Remote access to key scale metrics improves information management, troubleshooting and label changes without interrupting service.

When it's Hobart, it's done right. When a product is designed to reduce headaches, it had better deliver on its promise. That's why all Hobart scales, including the HT Series, are designed in-house and produced in the USA. It's why all the code for the HTe software is written in-house by Hobart. It's why Hobart remains the name you can trust today and count on in the future.

Your #1 supporter. Hobart, where equipment and service join together in support of

you. Hobart makes a full line of equipment for the foodservice and food retail industries, including cooking, food machines, weigh wrap, warewashers and Traulsen refrigeration. We support our customers when and where it counts the most. In the field, at your place. With nearly 200 locations and 1,700 factory-trained service representatives across the country, we're always close by to install, maintain and service your equipment. If that's the kind of support network you've been looking for, contact your Hobart representative today by calling 888-4HOBART.
