Hobart HS Series heavy-duty slicers: five fast facts

A Hobart HS Series slicer offers nearly as many benefits as there are ways to use it. *But here are five to remember.*

13" CleanCut™ knife with cobalt alloy edge ☆ 📏

This exclusive design includes stainless steel construction and a cobalt alloy edge, so it can last up to three times longer than ordinary knives. With a longer-lasting knife, the slicer can deliver more of the clean, precise cuts that you depend on.

Patented removable knife ☆ 💧 !

The CleanCut knife has a patented removable design, making it fast and easy to clean. That means more time can be spent on the prep needed to create amazing food.

Tilting, removable carriage ☆ 💧 👆

No other brand of slicer makes it this simple to operate and remove the carriage—so the machine is not only easier to use, but it's also easier and faster to clean. That means more time is available for food prep and kitchen creativity.

Zero knife exposure ☆ !

Another Hobart exclusive: Even when sharpening and cleaning the knife, unintentional contact with its sharp edge can be avoided.

Top-mounted Borazon® sharpening system ☆ 💧 📏 ! 👆

Keeping the slicer ready to make precise cuts couldn't be easier or faster: It just takes a single action to sharpen and hone the knife. Fifteen seconds later, the knife is ready to use—and the Borazon sharpening system is dishwasher safe, too. Only Hobart slicers have it.

Only Hobart HS Series slicers include these valuable features:

- 1 13" CleanCut™ knife with cobalt alloy edge
- 2 Patented removable knife
- 3 Tilting, removable carriage
- 4 Zero knife exposure
- 5 Top-mounted Borazon® sharpening system

Model shown: HS9
