

Automatic Wrapping | RELIABILITY

Count on reliable packaging and easy operation – day in, day out

**AUTOMATICALLY WEIGH,
WRAP AND LABEL PRODUCT**

HOBART AUTOMATIC WRAPPING MACHINES ARE THE TOTAL PACKAGE

Everything you need to keep your meat and seafood products safe, beautifully packaged and moving from shelf to checkout is available with Hobart automatic wrapping systems. The NextGen Double Roll and NextGen Single Roll systems weigh, wrap and label product while incorporating features designed to keep your cold room running:

- A durable pneumatic system sealed to withstand cold room moisture and humidity
- Cost-saving camera technology that optimizes film dispersal
- Internal sensors that adjust the wrapping process in real time
- Glove-enabled 14-inch touch screen with 3 swipeable screens, giving your operators 4.2 times more screen space to increase productivity
- High resolution printing for more label merchandising

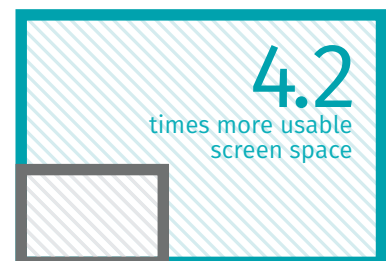

+ Hobart Automatic Wrapping Systems

MORE EFFICIENCY

Hobart auto wrapping machines incorporate a 14-inch touch screen with 3 swipeable screens, enabling 4.2X more usable space.

Hobart

Industry Standard

Reliable, long-term operation. Beautifully packaged food that stays sealed and fresh. Low cost of ownership. Get it all with Hobart automatic wrapping machines.

SAY ‘HELLO’ TO HOBART DURABILITY AND ‘GOODBYE’ TO FREQUENT FILM JAMS AND COSTLY REPAIRS.

BUILT FOR DURABILITY AND LOW MAINTENANCE COSTS

Hobart automatic wrapping systems are designed from the inside out to give your operations low total cost of ownership and, most importantly, reliability. Sensor-based operation cuts down on the film jams that can disable timing-based machines, while sealed pneumatics withstand the cold room humidity and moisture that can lessen the life of electromechanical wrappers.

Display Quality

Wrinkle-free, sealed results that ensure a superior customer experience.

Industry’s First 14-inch Touch Screen

3 swipectable screens gives 42-inches of usable screen space

HOBART AUTOMATIC WRAPPING SYSTEMS PROVIDE AN INDUSTRY-LEADING TOTAL COST OF OWNERSHIP SOLUTION.

When it comes to keeping meat and seafood fresh and ready for display, untidy wrapping that diminishes the product’s appearance, or worse yet, leads to spoilage, is not an option.

Hobart wrapping systems are built with industry-leading sealer belt technology to ensure secure bottom seals, and four-way stretch systems that provide a tight, crystal clear, wrinkle-free wrap that lets the quality of your meat products show through, no matter the brand of film you choose.

Hobart wrapping systems are also designed for easy and thorough cleaning. After covering the input console and printers, cold room workers simply hose down Hobart automatic wrapping machines with a standard industry spray-hose detergent/sanitizer system. Once the unit and film-clamping components are dry, the unit is ready to go again.
