Power-Wash
wash arms with anti-clogging nozzles ensure optimal, consistent performance.

Digital controls with diagnostics
easy to use, and easy to monitor, helping to prevent downtime while maximizing uptime.

Pre-Wash
softens stubborn contamination before reaching the power wash.

22" H x 30" W tunnel opening, optional 28"H available
large opening that can accommodate a wide variety of totes, trays, pans, and containers.

Hobart industrial washers provide best-in-class performance and durability, while consuming less water, energy and chemicals for greater lifetime value and superior sustainability. Contact us today for a free total cost of ownership and sustainability audit.

Variable-speed conveyor
adjustable conveyor speed from 4 FPM up to 8.5 FPM to accommodate various soil levels and container types.

Power-Rinse/ Final Rinse sections
wash arms with anti-clogging nozzles ensure optimal, consistent performance.

Two-stage solution straining system
for heavy soil environments, captures soil and fine particulate captured in the pump discharge.

360 wash and rinse
provides exceptional wash and rinse performance on all surfaces.

Cabinet-style doors
for easy access to wash arms, conveyor, and drains.

Easy to remove spray arms, debris pans and baskets
allows fast, easy, and thorough machine cleaning with no tools required.

Automatic temperature and water level controls with alarms
helps ensure consistent, predictable wash and rinse performance.

Stainless steel construction
304 16g stainless with 100% continuous penetration welds ensures long life without leaks.

Hobart factory startup
we ensure that your washer is correctly installed, operating at peak performance, and your staff correctly trained.
