HT Series Scale

7" Integrated Customer Display Option

Elevated Customer Display Option

HT SERIES LINERLESS W/AUTO CUTTER

Optional feature on HTm or HTi scales, up to 50% less cleaning required when compared to the competition. Used for printing on linerless label stock to reduce consumables costs.

HANGING & PORTION SCALES

Hanging scales are a classic alternative to digital portion scales or self-service scales. Commonly used in produce departments for check weighing and consumer use.

PR30
15.625" Dial

PR309
10.75" Dial

Portion scale commonly used for weighing ingredients, pre-packaged meals and prepared foods.

PS40-3

SELF-SERVICE MODELS

FS Series FreshServe™ – Free standing self-serve scale with large elevated touchscreen features an integrated scale and printer, is available in 3 sizes, and accepts linerless or die-cut labels. Optional image recognition, ValueMax™ technology, or barcode scanner.

HTi and HTm – Self-Serve scale with large elevated 14" touch screen, available as a counter scale or with optional pedestal.

Fish Platter

NGW AUTOMATIC WRAPPER

Ideal for high volume meat room wrapping, the NGW fully automatic wrapper will automatically weigh, wrap, price, and label meat products for retail sale. Available as left or right discharge and single or double roll capacity.

CLA SEMI-AUTOMATIC WRAPPER

CLAS Semi-Automatic wrap system is commonly used in medium-volume retail meat rooms. The CLAS system automatically weighs, conveys, and labels the package after it has been hand wrapped.

HWS MANUAL WRAP STATIONS

Manual hand wrap stations are typical for low to mid-volume meat rooms. A separate printer/console computes the price and prints a label to be manually applied.

TABLETOP WRAPPERS

Table mounted in delis, meat departments, and food preparation areas of retail grocers. Convenient for easily moving to where needed. Available in standard or energy smart versions.

W32 COMPACT HAND WRAP STATIONS

Compact hand wrap stations are commonly used with the CLA semi-automatic system, but also offer supplemental wrapping capability for overflow production. Available in standard or energy smart versions.

WRAP ACCESSORIES

Rotary Bin

Supplemental holding container for wrapped/ labeled product discharge.

HRT Roller Discharge Table

Used to allow extra space for overflow of product from wrapping equipment.

Gravity Conveyor

Used to convey product from automatic or semi-automatic wrapper to secondary location.
