

COMPLETE DELIME™

with Auto Delime, Auto Dispensing & Booster Guard™

Auto Delime combines water hardness & cycle counts to let operators know when it's the right time to delime.

Auto Dispensing automatically doses delimer into the machine.

Booster guard delimes the booster.

Simplify Deliming to Reduce Labor Time & Cost & Increase Safety

Auto Delime combines water hardness & cycle counts to let operators know when it's the right time to delime, saving time and chemicals while maintaining peak machine performance.

Auto Dispensing automatically doses delimer into the machine, preventing excessive dosing while reducing the handling of chemicals, making it safer for operators.

Booster Guard injects delimer directly into the booster, preserving machine life and helping to prevent premature booster failure.

EXPERIENCE REAL LABOR SAVINGS & INCREASED SAFETY FOR YOUR OPERATION*

<p>SAVE UP TO 30 MINUTES EACH TIME YOU DELIME</p>	<p>50%+ REDUCTION IN DELIME CYCLES</p>	<p>UP TO \$250 ANNUAL COST SAVINGS</p>	<p>ELIMINATE MANUAL POURING</p>
