

# Instructions to Pair **SCAN-1** Barcode Scanner to Hobart Combi

1. A short-range wireless connection is used to pair the scanner with combi as well as transfer 1-100 program settings into a combi. Programs can be created using Hobart's free HCPC software for a Windows based PC. For more information, download files from the Resource Center located at [www.hobartcorp.com](http://www.hobartcorp.com).

From the start screen (Hobart Logo at top), push the top Line Selector button for one or more seconds to display code.

Short-range wireless code used to pair combi with short-range wireless device.

2. Pairing the scanner to the combi is done thru parameter options: Press MINUS, PLUS, and ENTER (Arrow) at same time and hold for 3-5 seconds. Release buttons when the display screen changes to parameters screen.

3. Press the MINUS button until # 30 on the list is highlighted by white block over number. Do not make any other changes to other parameters.
4. Ensure scanner is fully charged and within 5 feet of combi. Press and hold bottom Line Selector & Enter (arrow) button. The screen will change again displaying a solid blue screen with a white line across the top. The combi is now searching for a factory programmed barcode scanner to pair up with.

Press and hold these two buttons to activate pairing mode for scanner.

- Wait until Combi finds a scanner to pair with, which could take up to 15 seconds. If no scanner is found the screen will exit automatically to parameters screen again. Redo step 4 again.
- Each scanner has a separate code to distinguish one from the other. Push the Line Selector button adjacent to the code number of the desired scanner to pair that scanner with combi. Once paired to the combi, the code will be displayed above the white line. The scanner will also signal the pairing is complete by making an audible sound.

No scanner paired yet

Push Line Selector button to pair

Scanner paired

Press to delete pairing between scanner and combi:

- Once the scanner has been paired you can exit the set up screen by pressing the "0" button at the top of the combi controls. Press it twice to exit all the way back to the start screen.
- If a scanner needs to be deleted from a paired combi press the top Line Selector button when this screen is displayed. It will remove the code and begin searching for a new scanner with which to pair.
