

ASSEMBLY & START-UP SCOPE OF WORK GUIDE

HOBART

PW20, AM15T & AM15VLT PREP WASHERS

For installation details or utility requirements, please refer to the operations/installation manuals and specification sheets.

NOTE: Local regulations may require a Water Tempering Kit which can be ordered through the Kroger ePRO catalog.

The cost of accessory assembly and start-up is included in the equipment pricing and is released to the local Authorized Hobart Office per the Retail Installation Credit (WRN Claim) program at time of shipment. Assembly does not include utility connections such as electrical, plumbing, or vent duct installation. Some divisions have Hobart perform additional installation work. These services are on a division-by-division basis and are invoiced to the division according to a separate DO submitted for these services accompanied by a written quote from the local installation office.

Other installation services available (at additional cost):

- Overtime installation (outside standard hours Monday-Friday, 8:00AM – 5:00PM).
- Removal and/or disposal of old unit(s) at remodel locations.
- Receiving, unloading or moving equipment into place.
- Special handling through restricted doorways and multi-level.
- Performing final utility connections.

Estimated Ship Date is typically 5–7 days prior to Need-by-Date, based on lead time and availability. Carrier is instructed to call the Store Manager, Project Manager or specified name as noted on the DO 24-hours prior to shipment to schedule delivery appointment.

DAMAGED SHIPMENTS OR SHORTAGES:

It is critical that receiving personnel carefully inspect **all** items and document the condition as well as any shortages on the delivery receipt when signing for freight. Refuse equipment with visible & unreparable damages and take detailed pictures. Concealed damage must be notified within 5 business days of receipt. Call carrier's local terminal immediately and request inspection only. Note date/time and who you spoke to. **Keep all original packaging materials for inspection, including pallets, plastic bags, stretch wrap, etc.** Do not move from delivery location, modify or install equipment.

Notify Customer Care immediately to report refused deliveries or concealed damage by calling (937) 332-7149 and emailing Julie Raymond all pictures and information at **Julie.Raymond@itwfeg.com**. ITW Food Equipment Group will initiate the carrier claims process once the damage has been assessed and any inspections completed.

KROGER PROJECT MANAGER/GENERAL CONTRACTOR RESPONSIBILITIES:

- Kroger Project Manager must contact the local Authorized Hobart Service Office to schedule assembly of applicable accessories and start-up.
- Receive, uncrate and set in place the PW20, AM15T or AM15VLT Prep Washer.
- Apply for any local permits that may be required.
- Connect all required electrical, plumbing and ventilation duct (if applicable) to equipment.
 - Installation of Water Pressure Regulator:
 - AM15T— Required if pressures greater than 25 PSI are present.
 - AM15VLT— This is a pumped rinse machine. Pressure regulators not required.
 - PW20— Required if pressures greater than 65 PSI are present.
 - Installation of Water Tempering Kit – if required by local code. Ordered separately through the Kroger ePRO catalog.
 - Installation of exhaust vent pipe from the Power Vent Kit to the roof— PW20 only. AM15T may require an overhead canopy exhaust hood.
- Provide for removal of all debris from property. Hobart will remove debris from installation site to dumpster location or back of store as designated by Project Manager.
- Contact Sanitation Manager or Chemical Supplier to install soap dispensers.

INSTALLING AUTHORIZED HOBART OFFICE RESPONSIBILITIES:

- Installation Team Manager shall provide a quote for any services requested outside the basic Scope of Work and arrange for a site survey with the Kroger Project Manager if necessary.
- Notify Project Manager immediately if concealed damage is found during assembly & start-up.
- Unpack and assemble all accessories.
- Remove debris from installation site to dumpster location or back of store as designated by Project Manager. Kroger is responsible for removal of all debris from property.
- PW20— Install Power Vent Kit and Vent Control Box.
- AM15T/AM15VLT—Install FRONT-LOAD Accessory Kit (if applicable).
- Verify utility connections, perform start-up and test operation.
- Complete training session with Kroger Associates. Demonstrate control operation as well as cleaning and general maintenance procedures.
- Submit WRN claim for installation credit and to activate warranty.
