# A-200 MIXER

**HOBART**

## STANDARD FEATURES

- ½ H.P. Hobart Designed Fixed Speed Motor
- Gear-Driven Transmission
- 15 Minute Timer
- Three Fixed Speeds
- Open Base
- Large, Easy-To-Reach Controls
- #12 Taper Attachment Hub
- Stainless Steel Bowl Guard
- Manual Bowl Lift
- 20-Quart Stainless Steel Bowl, "B" Flat Beater, "D" Wire Whip, Cord and Plug

## ACCESSORIES

- Stainless Steel Bowl
- "B" Flat Beater
- Stainless Steel "B" Beater
- "C" Wing Whip
- "D" Wire Whip
- "E" Dough Hook
- "ED" Dough Hook
- "P" Pastry Knife
- Bowl Splash Cover
- Bowl Scraper
- 12 Quart Accessories
- Ingredient Chute
- 9" Vegetable Slicer
- Meat Chopper Attachment

## MODEL

- A-200 – 20-Quart All Purpose Mixer
- A-200C – 20-Quart All Purpose Mixer with Maximum Security Correctional Package (115/60/1, Bench Model only)

## OPTIONS

- Deluxe Nickel Chrome Plate Finish (115/60/1 and 230/60/1, Bench Model only)
- Floor Model (Base is 21"W x 21½"D x 41¼"H)

Specifications, Details and Dimensions on Inside and Back.

# A-200 MIXER

## SOLUTIONS/BENEFITS

### ½ H.P. Hobart Designed Motor

Durability

- Heavy-duty to meet the most demanding operations

### 15-Minute Electric Timer

Convenience, Ease of Use, Consistency

- Supports recipe mixing times
- Simplifies operation
- Provides accurate results and eliminates overmixing

### Three Fixed Speeds

Flexibility, Reliability, Consistency

- For incorporating, blending, mixing ingredients
- Supports consistent results and thorough mixing

### Bowl Guard

Protection

- Safety interlock prevents operation when front portion of guard is out of position

### Gear-Driven Transmission

Durability, Reliability

- Ensures consistent performance and minimum downtime with positive drive under heavy loads

### Hobart Attachments

Durability, Flexibility

- Hobart manufactured accessories are designed for long-term usage under heavy-duty conditions
- Large array of attachments provide multiple uses for recipe and product processing

## A-200 MIXER CAPACITY CHART

Recommended Maximum Capacities - dough capacities based on 70°F. water and 12% flour moisture.

PRODUCT	AGITATORS SUITABLE FOR OPERATION	A-200
CAPACITY OF BOWL (QTS. LIQUID)		20
Egg Whites	D	1 qt.
Mashed Potatoes	B & C	15 lbs.
Mayonnaise (Qts. of Oil)	B or C or D	10 qts.
Meringue (Qts. of Water)	D	1½ pts.
Waffle or Hot Cake Batter	B	8 qts.
Whipped Cream	D or C	4 qts.
Cake, Angel Food (8-10 oz. cake)	C or I	15
Cake, Box or Slab	B or C	20 lbs.
Cake, Cup	B or C	20 lbs.
Cake, Layer	B or C	20 lbs.
Cake, Pound	B	21 lbs.
Cake, Short (Sponge)	C or I	15 lbs.
Cake, Sponge	C or I	12 lbs.
Cookies, Sugar	B	15 lbs.
Dough, Bread or Roll (Lt.-Med.) 60% AR	§ ED	25 lbs.□
Dough, Heavy Bread 55% AR	§ ED	15 lbs.□
Dough Pie	B & P	18 lbs.
Dough, Thin Pizza 40% AR (max. mix time 5 min.)	§‡ ED	9 lbs.□
Dough, Med. Pizza 50% AR	§‡ ED	10 lbs.□
Dough, Thick Pizza 60% AR	§‡ ED	20 lbs.□
Dough, Raised Donut 65% AR	ED	9 lbs.*
Dough, Whole Wheat 70% AR	ED	20 lbs.
Eggs & Sugar for Sponge Cake	B & C or I	8 lbs.
Icing, Fondant	B	12 lbs.
Icing, Marshmallow	C or I	2 lbs.
Shortening & Sugar, Creamed	B	16 lbs.
Pasta, Basic Egg Noodle (max. mix time 5 min.)	ED	5 lbs.

NOTE: % AR (% Absorption Ratio) - Water weight divided by flour weight. Capacity depends on moisture content of dough. Above capacities based on 12% flour moisture at 70°F water temperature.

□ 1st Speed

\* 2nd Speed

§ If high gluten flour is used, reduce above dough batch size by 10%.

‡ 2nd Speed should never be used on 50% AR or lower products.

**USE OF ICE REQUIRES A 10% REDUCTION IN BATCH SIZE.**

**1 gallon of water weighs 8.33 lbs.**

NOTE: Attachment hub should not be used while mixing.

## SPECIFICATIONS

### MOTOR:

½ H.P., Hobart designed, permanently lubricated ball bearings, splash-proof, fan cooled. Single-phase is capacitor-start, induction-run type.

Single Phase	115V	8.2 Amps
	230V	4.2 Amps

### ELECTRICAL:

115/60/1 and 230/60/1 – U L Listed. Also available in 100/50/1, 220/50/1, 100/60/1 and 220/60/1 – not submitted for U L Listing.

### CONTROLS:

Two-pole toggle switch with No Volt Release. A 15-minute electric timer is standard. Non-timed operation obtained by setting timer on “HOLD” position.

### TRANSMISSION:

Gear-driven. Gears are constant mesh heat-treated alloy steel. Anti-friction ball bearings. A hardened steel worm and special worm wheel transmit power from motor to transmission. Grease lubricated.

### SPEEDS:

Three positive speeds - Low, Intermediate, and High.

	Agitator (RPM)	Attachment (RPM)
Low	107	61
Intermediate	198	113
High	361	205

### BOWL GUARD:

Heavy-duty stainless steel wire front and solid stainless steel rear portion. Front portion of guard rotates easily to add ingredients and install or remove agitator. It detaches in seconds for cleaning in dishwasher or sink. Rear portion of guard can be quickly cleaned in position. Guard must be in closed position before mixer will operate. The bowl support lock prevents the bowl from being lowered while mixer is running. Bowl support interlock provides further protection.

### BOWL LIFT:

Hand crank operated, self-locking in any position.

### FINISH:

Standard Metallic Gray finish, Polyurethane Enamel. Deluxe finish has nickel-chrome plating on transmission case, bowl support, pedestal and base.

### STANDARD EQUIPMENT:

Consists of the mixer unit with cord and plug, one (1) 20-quart stainless steel bowl, one (1) “B” flat beater, one (1) “D” wire whip, stainless steel bowl guard, cord and plug.

### ATTACHMENT HUB:

When specified, comes with front-mounted Hobart standard #12 taper attachment hub for use with #12 size attachments.

NOTE: Use of attachment hub during mixing operation may result in a negative impact on performance and longevity of mixer.

### ATTACHMENTS AND ACCESSORIES:

The following are available at extra cost:

Stainless Steel Bowl	Bowl Splash Cover
“B” Flat Beater	Bowl Scraper
Stainless Steel “B” Beater	12 Quart Accessories
“C” Wing Whip	Ingredient Chute
“D” Wire Whip	9" Vegetable Slicer
“E” Dough Hook	Meat Chopper
“ED” Dough Hook	Attachment
“P” Pastry Knife	

**Hobart Bowl Scraper**

**Hobart Ingredient Chute**

**LISTED BY:** Underwriters Laboratories, Inc. and the National Sanitation Foundation.

# A-200 MIXER

## SPECIFICATIONS

**ELECTRICAL SPECIFICATIONS:** 115/60/1 and 230/60/1 – U L Listed. Also available in 100/50/1, 220/50/1, 100/60/1 and 220/60/1 – not submitted for U L Listing.

**WEIGHT:** 204 lbs. net; 226 lbs. domestic shipping. Floor Model: 230 lbs. net; 296 lbs. domestic weight.

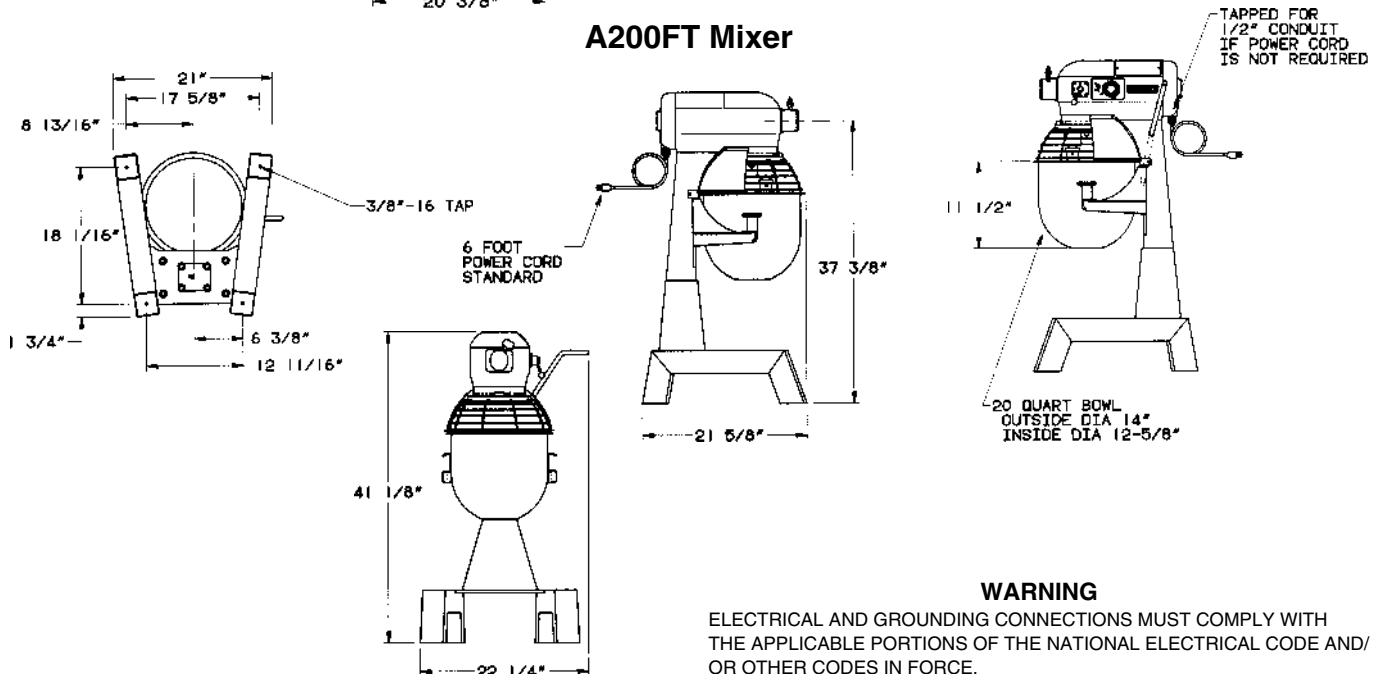

**WARRANTY:** Unit has full one-year warranty on parts, labor and mileage against manufacturer's defects. Service contracts are available.

FORM 34387 (Feb. 2000)

**MODEL A200 MIXER**

# Installation, Operation, and Care of A200 MIXER

## SAVE THESE INSTRUCTIONS

### GENERAL

The model A200 mixer is a 20 quart, bench-type mixer with a 1/2 H.P. motor, and a #12 attachment hub. With the use of special agitators, a 12 quart bowl may be used on the A200 mixers.

The floor model and the deluxe finish model are equipped with a timer.

Most A200 mixers are equipped with a 0 - 15 minute timer.

There are a variety of attachments and accessories available for all models, and these are explained in a separate *Use and Applications Handbook* which is supplied with each mixer.

### INSTALLATION

#### UNPACKING

Immediately after unpacking the mixer, check for possible shipping damage. If this machine is found to be damaged after unpacking, save the packaging material and contact the carrier within 15 days of delivery.

Prior to installation, test the electrical service to assure that it agrees with the specifications on the machine data plate.

#### LOCATION

Place the mixer on a suitable sturdy level surface. There should be adequate space around the mixer for the user to operate the controls and install and remove bowls.

Holes are provided in the base to permanently secure the mixer, although this is not necessary in normal installations. Four plastic plugs are supplied with the mixer to plug these holes if they are not used.

#### ELECTRICAL CONNECTIONS (Cord Connected Mixers)

**WARNING:** THE ELECTRICAL CORD ON THIS MACHINE IS EQUIPPED WITH A THREE-PRONGED GROUNDING PLUG WHICH MUST BE CONNECTED TO A PROPERLY GROUNDING RECEPTACLE. IF THE RECEPTACLE IS NOT THE PROPER GROUNDING TYPE, CONTACT AN ELECTRICIAN. DO NOT REMOVE THE GROUNDING PRONG FROM THE PLUG.

# OPERATION

**WARNING:** MOVING BEATER IN BOWL. KEEP HANDS, CLOTHING, AND UTENSILS OUT WHILE IN OPERATION, DO NOT USE WITHOUT INTERLOCKED GUARD.

## CONTROLS

All models are furnished with an On-Off toggle switch which controls power to the mixer.

The Bowl Guard must be in position or the mixer will not operate. Refer to page 6.

If the Bowl Support is not all the way up, the mixer will not operate unless the On-Off switch is held in the up position.

The TIMER (if equipped) is used in conjunction with the On-Off switch for timed mixing operations and will stop the mixer when the desired time has elapsed.

With the timer set on HOLD, the mixer will run until the On-Off switch is turned to Off.

The GEAR SHIFT LEVER (Fig. 1) is used to change speeds. Always stop the mixer before changing speeds. To change speeds, turn the switch Off, move the gear shift lever to the desired speed, and turn the switch back On.

Speed 1 (Low) — This speed is for heavy mixtures such as bread dough, heavy batters, and potatoes.

Speed 2 (Medium) — This speed is for light dough which must rise quickly, cake batters, and some whipping operations.

Speed 3 (High) — This is a fast speed for light work such as whipping cream, beating eggs, and mixing thin batters.

The BOWL LIFT HANDLE (Fig. 1) is used to raise and lower the bowl. To raise the bowl, rotate the handle upward; rotating the handle downward lowers the bowl.

## MIXING

This section explains operation of the mixer and how to install bowls, agitators, and attachments. A separate *Use and Applications Handbook* is provided with the mixer which contains information on mixing procedures and outlines specific uses for agitators, attachments, and accessories.

### Bowl

New mixer bowls and agitators (beaters, whips, and dough arms) should be thoroughly washed with hot water and a mild soap solution, rinsed with either a mild soda or vinegar solution, and thoroughly rinsed with clear water BEFORE being put into service. This cleaning procedure should also be followed for bowls and agitators before whipping egg whites or whole eggs.

The bowl must be installed before the agitator. To install the bowl, fully lower the bowl support (Fig. 1). Position the bowl so the alignment bracket on the back of the bowl is in the bowl retainer and the alignment pins (Fig. 1) on the front of the bowl support fit in the holes on the sides of the bowl. Lock the bowl in place by rotating the bowl clamps (Fig. 1) over the ears of the bowl.

### Agitator

To install an agitator (Fig. 1), the bowl must be installed and fully lowered. Place the agitator in the bowl, push it up on the agitator shaft, and turn it clockwise to seat the shaft pin in the slot of the agitator shank.

Fig. 1

### To Raise the Bowl While Mixing

To raise the bowl while the agitator is mixing the product (when required by recipe or when using the Bowl Scraper Attachment): Load ingredients. Close Wire Cage Assembly. Select Low speed. To begin mixing, hold the On-Off switch in the up position; then raise the bowl.

### Attachments

To install an attachment, loosen the thumb screw on the attachment hub (Fig. 1) and remove the plug. Insert the attachment into the attachment hub making certain that the square shank of the attachment is in the square driver of the mixer. Secure the attachment by tightening the thumb screw.

Move the gear shift lever to the desired speed and start the mixer to operate the attachment.

The meat and food chopper attachment should be operated in second or third speed. If material in the cylinder stalls the mixer, stop the mixer at once. DO NOT attempt to restart the mixer in a lower speed — remove the adjusting ring, knife, plate, and worm and clear the obstruction. THIS ATTACHMENT MUST NOT BE USED TO CHOP BREAD CRUMBS.

**NOTE:** Attachment hub should not be used while mixing.

### Bowl Scraper Attachment

The Mixer Bowl Scraper Attachment (when ordered) is provided with a separate instruction manual covering its installation, operation, use and care.

## **Bowl Guard (Fig. 2)**

The Wire Cage Assembly on the Bowl Guard can be rotated out-of-the-way to add ingredients or access the bowl and agitator.

### **To rotate the Wire Cage Assembly to the rear . . .**

Rotate the Wire Cage Assembly to the left until it is positioned underneath the Splash Guard. Note how the grooves on the nylon Retainers allow the Wire Cage to ride around the circular Ridge of the planetary Drip Cup.

The Wire Cage must be returned to the front and center position for the mixer to operate.

### **To remove the Wire Cage Assembly for cleaning . . .**

Lower the Bowl. Rotate the Wire Cage Assembly to the left until it is positioned underneath the Splash Guard. Remove both Agitator and Bowl.

While holding the Wire Cage Assembly with both hands, rotate it completely to the left. When the front-center Retainer reaches the end of its travel, it can be lowered through the flat on the Ridge of the Drip Cup. After lowering the front-center Retainer, move the Wire Cage Assembly slightly to the rear so the Rear Retainers clear the Ridge on the Drip Cup. The Wire Cage Assembly can now be lowered and removed.

Wash the Wire Cage in a sink or dishwasher; rinse with clear water; and dry with a clean cloth.

The stainless steel Splash Guard can be wiped off or washed easily with a cloth or sponge and warm soapy water. Rinse with clear water. Dry with a clean cloth.

### **To reinstall the Wire Cage Assembly . . .**

Hold the Wire Cage so its top ring is positioned around the planetary Drip Cup with the grooves in both nylon Rear Retainers straddling the Ridge on the Drip Cup at the rear. Lift the Wire Cage Assembly so the front-center Retainer passes up through the flat on the Ridge of the Drip Cup and rotate the Wire Cage Assembly to the right. The Wire Cage is properly assembled when all three Retainers straddle the Ridge on the Drip Cup in the three opposed locations. Rotate the Wire Cage Assembly to the right until it stops at the front-center position.

Rotate the Wire Cage out-of-the-way to install or remove the Agitator and Bowl or to add ingredients.

Return the Wire Cage to its front-center position to operate the mixer.

To Remove:

Rotate Wire Cage to the Left 340 Degrees until the Front-Center Retainer can be lowered through the Flat on the Ridge of the Drip Cup.

PL-40562-1

**Fig. 2**

## **CLEANING**

**WARNING:** UNPLUG MACHINE POWER CORD BEFORE BEGINNING ANY CLEANING PROCEDURE.

The mixer should be thoroughly cleaned daily.

Bowls and agitators should be removed from the mixer and cleaned in a sink.

DO NOT use a hose to clean the mixer — it should be washed with a clean damp cloth. The apron (Fig. 1) may be removed by loosening the thumb screws.

The Drip Cup-Splash Guard (which is secured by three screws) should be removed periodically and wiped clean.

For cleaning the Bowl Guard (including both Wire Cage Assembly and Splash Guard), refer to page 6.

## **MAINTENANCE**

**WARNING:** UNPLUG MACHINE POWER CORD BEFORE BEGINNING ANY MAINTENANCE PROCEDURE.

### **LUBRICATION**

Bowl Clamps (Fig. 1) should be lubricated twice a year.

#### **Motor**

The motor has sealed ball bearings which require no lubrication maintenance.

#### **Bowl Lift Slideways**

The slideways (Fig. 1) should be lubricated once each month. Remove the apron (Fig. 1) secured by two thumb screws to expose the slideways. Then apply a light coat of Lubriplate 630AA (supplied) to three sides of both slideways. Replace the apron and thumb screws.

## **SERVICE**

If service is needed on this equipment, contact your local Hobart Service Office.

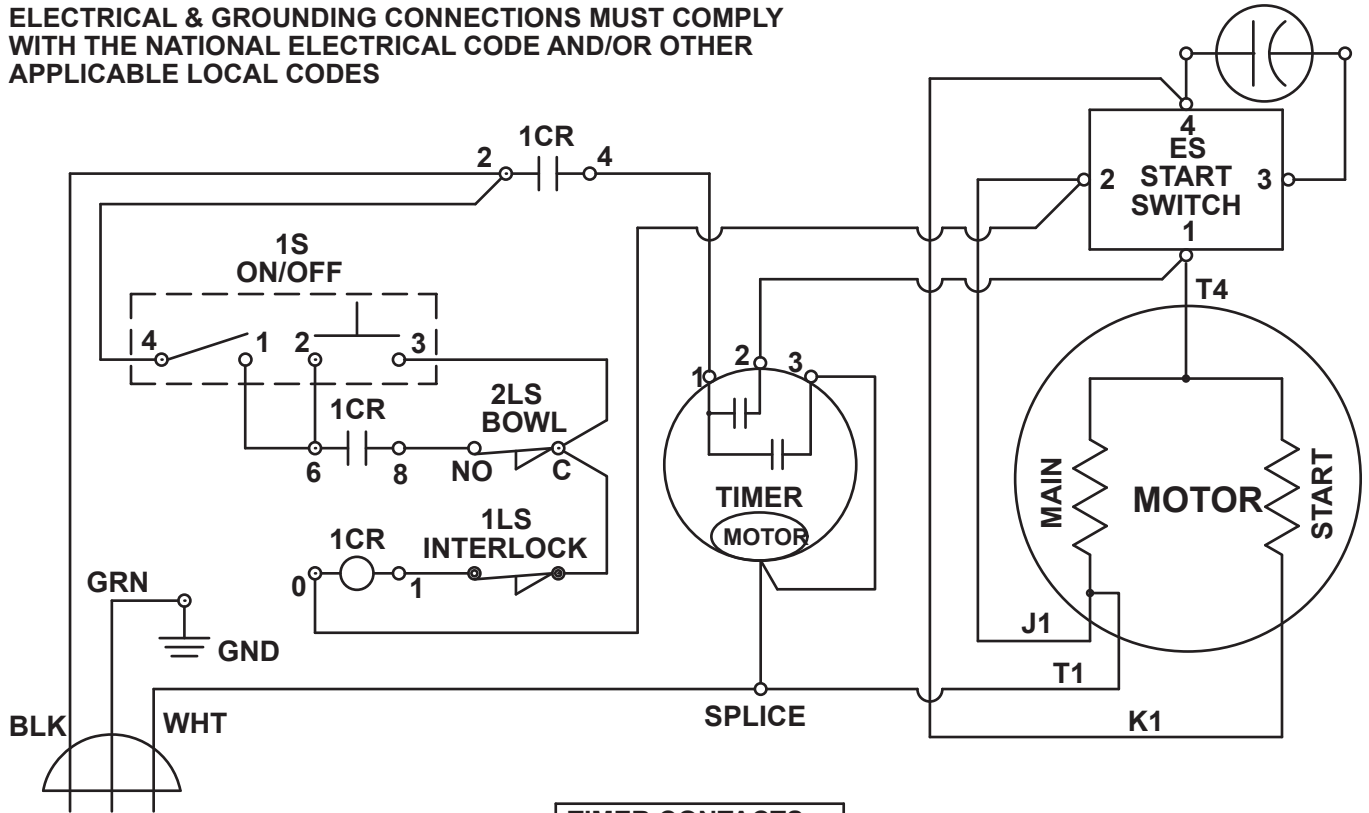

# TROUBLESHOOTING A200 MIXER

SYMPTOM	POSSIBLE CAUSE
Mixer will not start.	<ol style="list-style-type: none"><li>1. Circuit protector in open position - check fuse or disconnect switch.</li><li>2. Mixer or attachment overloaded.</li><li>3. Bowl not all the way up.</li><li>4. Wire Cage Assembly is not in the front-center position.</li></ol>

**NOTE:**

If symptom(s) persists after possible causes have been checked, contact your local Hobart Service Office.
