

# 01 WRAPPING EQUIPMENT

## AUTOMATIC WRAPPING SYSTEM

Fully automatic wrapper. The Hobart **NGW** uses an advanced sensor system and camera technology to automatically size your package, weigh, and wrap with optimal film efficiency by variable film roll selection and cut length. The NGW automatically stretches film around all 4 sides, seals the tray, computes price and applies the label. Electric motors power weigher/scale intake conveyor and auto-centering. The NGW is a tank-based pneumatic driven wrapping system.

### MODELS:

**NGW1-LS2RL** (Right to left, 1 Roll Film)

**NGW1-LS2LR** (Left to right, 1 Roll Film)

**NGW2-LS2RL** (Right to left, 2 Rolls Film)

**NGW2-LS2LR** (Left to right, 2 Roll Film)

### COMMON APPLICATIONS

- Automatically weigh, wrap, price and label: Meat, Seafood, Cheese, Produce, Prepared Foods, etc.
- Well suited for wrapping many packages of like product in a continuous flow process.

### SEGMENT SPECIFIC OPPORTUNITIES

- Meat Rooms in Retail Grocery Stores
- Wholesale Clubs
- Gourmet Supermarkets
- Commissaries

Semi-Automatic and automatic wrappers are primarily used to wrap fresh meat, seafood, produce, etc. in retail grocery meat rooms. The wrapped product can then be transferred to store shelves for purchase. These equipment varieties offer the grocers flexibility in product type and quantity to best fit the requirements of each store. With the NGW automatic wrapping machine, an operator loads the product on the tray and into the machine. The wrapper weighs, wraps, computes the price, and labels the product automatically. The product is then moved off the sealer belt and the next tray of product cycles through. The NGW can wrap up to 30 packages per minute and handle varying package sizes and weights.

## KEY ATTRIBUTES AND VALUE PROPOSITION

**A Smaller Footprint**  
to make the most of your meat room space

**Reduce Downtime and Maintenance Costs**  
with “copy machine” diagnostics; Alert icons (urgent messaging center) built-in to the user interface provide users with quick troubleshooting, and fewer service calls

**Advanced Closed-Loop Sensor System**  
makes rapid, automated adjustments to optimize wrapping process and minimize downtime

**Enhanced Durable Pneumatic System**  
sealed to withstand meat room moisture and humidity

**Hose Down Cleaning Capability**  
suitable for meat room environments

**4-way Film Stretch and Advanced Camera Technology**  
optimizing film usage and reducing waste

**Quality & Performance**  
Hobart products are designed for accuracy, speed, and reliability

**Total Cost of Ownership**  
Designed to reduce ownership costs and maximize lifespan

**Ease of Use**  
Easy navigation, user-friendly interface

**Sustainability**  
Energy Efficient design and operation

# SEMI-AUTOMATIC WRAPPING SYSTEM

The Hobart **CLAS-B** semi-automatic wrapping system weighs your product and provides label application after a package has been hand wrapped.

Semi-Automatic and automatic wrappers are primarily used to wrap fresh meat and seafood in retail grocers. The wrapped product can then be transferred to store shelves for purchase. These equipment varieties offer the grocers flexibility in product type and quantity to best fit the requirements of each store.

Hobart offers a variety of accessories to go with the CLAS-B to customize the best solution for your meat room. Left to Right or Right to Left orientation must be determined for purchase.

## MODELS:

**CLAS-IRLB** (Right to left)

**CLAS-ILRB** (Left to right)

## COMMON APPLICATIONS

- Manually wrap and automatically weigh and label trays of meat, seafood, cheese, produce, prepared foods, etc.

## SEGMENT SPECIFIC OPPORTUNITIES

- Meat rooms and food preparation areas of retail grocers, wholesale clubs, gourmet supermarkets, commissaries, etc.

# HAND WRAP STATION

The Hobart hand wrapping system is designed for the operator to manually weigh and wrap a package and then place the wrapped package on the heated sealing pad.

A separate, remote printer/console (HTsP, HTiP, HTxP, EPCP-5i/EPP-3) will compute the price and print the label for the operator to manually apply to the package.

## MODELS:

**HWS-4-C (Standard)**

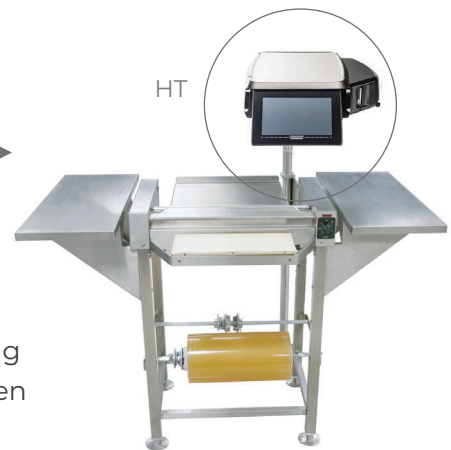

**HWS-4-ES (Energy Smart)**

ACCESS

◀ Available in ACCESS or HT versions, standard (-C) or Energy Smart (-ES). ▶

The Energy Smart version utilizes less energy by activating the heat sealing plate only when product is present.

HT

## COMMON APPLICATIONS

- Manually weigh, wrap, and label trays of meat, seafood, cheese, produce, prepared foods, etc.

## SEGMENT SPECIFIC OPPORTUNITIES

- Meat rooms and food preparation areas of retail grocers, wholesale clubs, gourmet supermarkets, commissaries, etc.

# COMPACT HAND WRAP STATION

**W32ES-1** Energy Smart wrap station is used with the CLAS-B semi-automatic wrapping system and can also be used as a stand alone wrap station. The Energy Smart wrap station utilizes less energy by activating the heat sealing plate only when product is present.

**W32C-5** Stand-Alone wrap station offers a sealing plate and 2-roll film capacity.

## MODELS:

**W32C-5** (Stand Alone)

**W32ES-1** (Energy Smart Stand Alone)

W32C-5

W32ES-1

## COMMON APPLICATIONS

- Manually wrap trays of meat, seafood, cheese, produce, prepared foods, etc.

## SEGMENT SPECIFIC OPPORTUNITIES

- Meat rooms and food preparation areas of retail grocers, wholesale clubs, gourmet supermarkets, commissaries, etc.

# TABLE TOP WRAPPER

A simple and convenient tabletop wrapper. This light-weight wrapper can easily be moved to where it is needed, when it is needed. Available in standard (A) or Energy Smart (ES-1) versions. Energy smart version utilize less energy by activating the heat sealing plate only when product is present.

6" x 15" hot plate for sealing,  
stainless steel wrapper  
surface, portable.

625ES-1

## MODELS:

**625A**

**625ES-1 (Energy Smart)**

## COMMON APPLICATIONS

- Manually wrap trays of meat, seafood, cheese, produce, prepared foods, etc.

## SEGMENT SPECIFIC OPPORTUNITIES

- Table mounted in food preparation areas of retail grocers, wholesale clubs, gourmet supermarkets, commissaries, etc.

# ACCESSORIES

---

HRT5-3

## **HRT5-3 Roller/Discharge Table**

Used to allow additional space for overflow of product from wrapping machinery

## **HRT-LD136**

Single Tier label dispenser for 36" wide table (HRT5-3)

## **HRT-LD236**

Double Tier label dispenser for 36" wide table (HRT5-3)

RBG-2

## **RBG-2**

Rotary Bin – Supplemental holding container for wrapped/labeled product

GRVCON-1

## **GRVCON-1**

4 ft. Gravity conveyor

## **HWS-WRAPAD**

Spring loaded package rest for standard hand wrap station

## **ES-SHELF-RT**

Right side shelf for W32ES-1 wrap station

## **ES-SHELF-LT**

Left side shelf for W32ES-1 wrap station

## **ACCESS CONTROL PANEL:**

**EPCP-5s** – Access prepack control panel with Linux operating system

## **PRINTER:**

**EPP-3** – Access prepack printer – Also integrated into the NGW automatic wrapper
