

CEM SERIES COMBI OVENS

DAILY CLEANING PROCEDURES

STEP 1 – Place the oven in cool down mode. Let the oven cool to below 140°F (60°C).

STEP 2 – Fill the spray bottle with a mild oven detergent. We recommend the following cleaners: *Greasecutter Plus* by Ecolab, *EZ Clean* by Cello, or *Advance Oven Cleaner* by Diversey-Lever. **DO NOT USE ABRASIVE CLEANERS OR CHLORIDES ON YOUR VULCAN COMBI OVEN.** Be sure to read and follow the MSDS or safety instructions on the bottle of your oven cleaner.

STEP 3 – Spray the oven interior with oven cleaner. Turn the nozzle to adjust the spray pattern.

STEP 4 – Close the door. Place the oven in steam mode for 10 minutes.

STEP 5 – When finished steaming, open the door and rinse the interior with the attached spray hose. Wipe down door gasket with clean towel.

STEP 6 – Leave the door open overnight to vent the oven. *If the oven will not be used for an extended period of time, place the oven in hot air mode to dry.*
