AGM HEAVY DUTY GAS GRIDDLES

**AGM24
AGM36
AGM48
AGM60
AGM72**

INTRODUCTION

The AGM model designation is shared by three designs that operate in the same manner and have the same basic dimensions; however, most service parts for the first two of the designs are not interchangeable. The first design was manufactured prior to March of 2010; the second design began manufacture in March of 2010, and finally, the third design began manufacture in November of 2023.

Models produced before March 2010 will have the gas inlet located 8" from the left corner and models produced March 2010 to present will have a gas inlet located 3.5" from the right corner. AGM models manufactured prior to March 2010 will have a removable bullnose (see item 13 on page 3) and AGM models manufactured March 2010 to present will have a bullnose that is welded to the griddle plate assembly and cannot be removed. The image on the front cover represents models manufactured from November 2023 to present.
